

The TERECOP training methodology

www.terecop.eu

Stage	activities
Engagement	Learners are engaged in discussions about problems from their everyday life and ask for solutions that involve robotics
Exploration	Learners working in groups explore available kits, experimental devices, and programming tools that they will use to solve the problem discussed in previous stage
Investigation	Learners investigate the problem, plan and design their own project and set their own evaluation criteria
Creation	Learners share and combine their ideas, synthesize solutions and suggestions and create their own final artifacts and solutions
Evaluation	Learners write reports, present and discuss in plenary their final products and projects and self-evaluate them
